

Pedestrian Push Button 4EVR MOAB

Campbell Company Pedestrian Safety

The new pedestrian push button 4EVR MOAB is the toughest button on the market.

Description

The 4 EVR MOAB is the toughest button on the market. The MOAB is the next generation of solid-state pushbuttons, with a superior machined aluminum bezel it is resistant to vandalism, impact, extreme weather and neglect the MOAB is a proven reliable button. The MOAB utilizes a new flush mount form factor and features higher volume, lower power consumption, self-latching capability, and improved transient protection than previous buttons. With no moving plunger or electrical contacts, it is completely insulated to preclude electrical shock under any weather condition. The MOAB utilizes a piezo switch element that cannot be stuck in a constant call. The actuator is pressure sensitive and mechanically isolated from the piezo switch so it cannot be damaged.

Specifications

- Solid State Piezo Switch
- Pressure Sensitive
- Flush Mount, Button Cups Not Required
- Cannot be stuck in Constant Call
- Virtually Vandal Proof
- Programmable at the intersection - Momentary and Latching LED Modes
- Lower Power Consumption
- Louder Audible "Dee-Dah" Feedback
- ADA, MUTCD, and TAC Compliant
- 5 Year Limited Warranty
