

LED Blank Out Sign - No Parking

Orange Traffic

LED No Parking Signs ensure an equitable use of roadways according to users' needs and the configuration of traffic lanes.

Description

LED No Parking Signs were created to increase visibility of road users during snow removal periods and are much more visible than a temporary fixed snow removal panel. It can be activated remotely through cellular communication or via transceiver remote control.

It can also be useful during parking bans or to control time of day parking as well as planned or unplanned special events.

Orange Traffic uses the highest quality of LED lights to ensure visibility and durability of the product.
